

Suavissimamente il codice che riscontrava errori: ```Java final File firefoxPath = new File(System.getProperty("portal.deploy.firefox.path", "/usr/bin/firefox")); String Xport = System.getProperty("portal.xvfb.id", ":1"); driver = new FirefoxDriver( new GeckoDriverService.Builder().usingDriverExecutable(new File("/usr/bin/geckodriver")).usingFirefoxBinary(new FirefoxBinary(firefoxPath)).withEnvironment(ImmutableMap.of("DISPLAY", Xport)).build()); ```
